

## UoS Year 9 Exploring Higher Education Programme (Jan-Feb 2022) / Options Evening

Moon Hall School are very excited to be continuing to add to our activities with our new friends at the University of Surrey, taking part in their Widening Participation programme designed to inform our students about the possibilities of higher education.

All our **Year 9s** engaged in the **3 day event**, the highlight of which (for many) was trying to buy as much as they could using their lunch voucher, in one of the student cafes, and trying not have any change left over:

**Day 1 (UoS campus)** - a welcome and introduction to university life, campus tour and 'design, build, reuse' engineering challenge

**Day 2 (UoS campus)** - society tasters in origami and debating, a taster lesson in Microbiology, and information on support and well-being

**Day 3 (Moon Hall)** - careers and pathways advice and guidance, and then **help with choosing Options**. We were then delighted to be able to invite Year 9 parents to share in our Year 9 pupils' "**Graduation**" from this three day programme - caps and gowns worn with pride!
